“When you do not listen to me, you will feel the pangs of conscience and you will become sick. (This means) you let bad fungus start to eat your body and therefore, for example, you would end up having cancer. I provided 8 textbooks and teaching materials (so that that would not happen.)”

“I forgot the songs I had sung, and the songs I sing now have been different.”

“When I listen to my speech that I gave 60 years ago, I am moved. Why? It is like the food you enjoyed when you were three years old and you would be able to enjoy it yet. It is like the food that would remind you of your mother who made it, the environment that you were in, and the air that you breathed.”
